NOTE.—The figures in the above Table (No. 4) give the amount of the actual net receipts derived from the Revenue due to the Exchequer; and do not therefore correspond exactly with the figures in Table No. 2, which gives the payments made into the Exchequer, "Exchequer Receipts," on account of these duties in each year.

\* The net receipt of Property and Income Tax, &c., represents the amount of Tax actually collected within the year (irrespective of the year of assessment) less the amount of Tax refunded, &c., within the year (see note § on page 35). The amounts under the several schedules show the approximate net receipt of the Tax based on the assessments of property and income under each schedule.

† Stamps on Patent Medicines and Playing Cards transferred to Excise from 1st April 1909.

§ Including arrears of 1909–10.

NOTE.—The loss to Revenue caused by the reduction of Taxes is in most cases less than the gain which the reduction affords to the taxpayer, because the loss to Revenue is generally recouped by an increased consumption or use of the articles taxed consequent upon the lowering of the duty. Hence the loss is not necessarily the measure of relief to the taxpayer.

\* As the Finance Act for 1909-10 was not passed until the 29th April, 1910, these allowances were not operative during that year.

NOTE.—As an increase of duty may lead to a diminished consumption or use of the articles taxed, the gain to Revenue is not necessarily a measure of the burden of the increase on the taxpayer.

† The increased Stamp Duties did not come into force until the year 1910-11.

† The total expenditure given above slightly differs each year from that given in Table No. 22 (pp. 48-9), owing mainly to the exclusion of the expenditure of Police Pension Funds (which is included in the previous Table), and to the educational returns being taken from different sources, whereby, in 1902-3 to 1907-8, certain expenditure on account of higher class public schools is included in the above figures but excluded from those given in Table No. 22.

‡ Inclusive of the cost of collection of school rates by Parish Authorities under the Poor Law Acts to 1898-9, excluded in subsequent years. The election expenses paid to County and Burgh Authorities under the same Acts are excluded in all years.

¶ Includes 738,946*l.* in respect of expenditure incurred in former years and met temporarily out of Contingent, &c., Funds.

In the case of Rice, Rice Meal and Flour, for which Imports less Total Exports have been given, which, Chicory, Cocoa, Coffee, Currants and Raisins, Glucose, Tea, Wine and Spirits, the quantities over-entered and those exported, on instance. The quantities of dutiable articles cleared from bonded warehouses or exported on drawback as "ships' stores" are not included.

As regards Tobacco, the quantity of unmanufactured Tobacco retained for home consumption has been arrived at by deducting duty from unmanufactured Tobacco entered for home consumption. The figures for manufactured Tobacco represent the quantities retained for home consumption.

\* In years prior to 1907, a small quantity of salted Meat is included with "Other sorts, Fresh and Refrigerated," for which see previous page.

† Approximate figures—domestic exports of 'molasses' not being separately distinguished prior to 1902.

*Note.*—The figures in italics for the years 1899, 1900, 1901, and 1902 show the tonnage of vessels employed by Government in the conveyance of troops, stores, &c., from South Africa. These figures are *not* included in the figures in Roman type above.

† The figures for Plymouth and Southampton have been increased by the inclusion of vessels "calling off" the port to land or embark passengers or baggage. Such vessels, unless "brought to" in the immediate vicinity of docks or quays, were excluded up to the end of 1906, but have been included from 1st January 1907.

Notes.--The above Return includes vessels belonging to the Isle of Man and the Channel Islands.

The number of persons employed in the year is the sum of the number of persons forming the first crew of each vessel employed during the year.

The Home Trade includes vessels trading or going within the following limits, viz.: the United Kingdom, the Isle of Man, the Channel Islands, and the Continent of Europe between the River Elbe and Brest.

The Foreign Trade includes vessels trading or going beyond the above limits.

Some vessels known to be trading abroad are omitted from the Return owing to the fact that no late information of the number of their crews could be obtained.

\* Vessels employed on rivers and going beyond smooth water limits as defined in the regulations regarding Passenger Vessels, but not beyond partially smooth water limits, have been excluded from the Employment Returns since the end of 1910. 781 sailing vessels of 34,976 tons and 86 steam vessels of 3,809 tons, which would have been included in the totals for 1911 had the basis remained unchanged, have thus been excluded.

† Including Masters, Pilots and Lascars. The numbers of British and Foreign sailors and of Lascars are stated below:—

† Inclusive of Beet-root.

‡ The apparent changes in the area under grass in 1906 and later years as compared with previous years are largely due to greater care in classification in the Irish Agricultural Returns and to the transfer of some grass lands from one category to another, while certain areas previously included as pasture are now included in a new item, "grazed mountain land."

§ Including Orchards.

† A revision of the list of articles included under the head of Minerals was made in the year 1903, and the tonnages of Minerals and General Merchandise, and the receipts therefrom, are not strictly comparable with those given in prior years.

‡ Weight of Minerals and General Merchandise, the details for which cannot be separately distinguished.

§ The decrease shown, on comparison with 1907, is apparent only—a duplication of 20 miles in the returns made to the Board of Trade having been corrected in 1908.

NOTE.—Most British Joint Stock Banks are registered under the Companies Act, 1862, and, consequently, the bulk of the Capital of such concerns is included in the figures given in the above Tables. With the exception of Municipal Tramways, the majority of the Companies working tramways in the United Kingdom are registered under the Companies Acts, and their Capital is accordingly also included. Railway Companies in the United Kingdom are not incorporated under the Companies Acts, but by special Acts of Parliament, as they need powers beyond those conferred by registration under the Companies Acts. Their Capital is, therefore, not comprised in these Tables.

NOTE.—For additional particulars to those given in above Tables respecting the British Army, see the General Annual Report on the British Army for year ended 30th September, 1911, Cd. 6065.

\* On the 1st January of the year following that stated.

† The Militia strength is that at the date of inspection, except for the years 1900, 1901 and 1902, when the date was 1st July. The Reserve Division strength is that on the 1st July. The Militia Reserve disappeared before the inspection of 1907.

‡ At the date of inspection. § On the 1st November in each year. ¶ The decrease between 1898 and 1899 is due to the number of men called out in the latter part of 1899 for active service. The number so called out form part of the Regular Army, but the increase in the number of the Regular Army shown in the previous Table does not correspond with the decrease shown in this Table, because the average strength of the Regular Army for the year is shown and not the number at a given date, as in the case of the Army Reserve.

\*\* Includes 2,163 Volunteers.

†† Strength on 1st October of each of the years stated. The Militia was converted into the Special Reserve during 1908. From 1908 inclusive there were, in addition, a number of Militiamen and men of the Reserve Division still serving on their old term of engagement.

‡‡ Strength on 1st October of each of the years stated, including the Isle of Man Volunteers. There were also, on 1st October 1911, 656 of all ranks in the Territorial Force Reserve.

‡ For years up to 31st July, 1903, the figures give the number of Scholars on account of whom grant was claimed. This explains the decrease after 1903 in the figures given in the last two columns.

§ For these years, boys and girls of the age of 15 and over are included in the two preceding columns.

\* For years up to 31st July, 1904, reference should be made to the Statistics relating to Secondary Schools and Schools of Science contained in the Volumes of Statistics and the Annual Reports published by the Board of Education. The figures are not given here, because in many cases they include particulars which cannot properly be compared with those given in this table. The term "Secondary School" bears the meaning assigned to it in the Board of Education's "Regulations for Secondary Schools."

† Part-time Teachers are counted once for each school in which they serve.

‡ The figures for years up to the year ended 31st July, 1907, and those for Wales included in the figures for the year ended 31st July, 1908, relate to 30th June of the year, or, in the case of a comparatively small number of schools, to the following 30th November. The figures for England included in those for the year ended 31st July, 1909, and the figures for subsequent years, give the number of pupils on 31st January of the year, classified according to their ages on the preceding 31st July.

The year ended 31st July, 1902, was a transitional year.

† Students who attended more than one School are counted separately in respect of each School which they attended; the number of individual Students was therefore less than the number given in the table.
